

Description

Complete turnkey Hot Yoga studio system. A fully integrated system that includes ventilation, heating, humidification, energy conservation with closed proportional control, and easy installation and maintenance. Designed to reliably maintain 104°F (40°C) with 50% RH in a space of up to 7060 cu.ft. (200m³). Air supply can come directly from the room or from a local duct network.

Features

- 3-in-1: Heating, ventilation and humidification
- External/remote temperature/humidity sensor
- 3-speed fan
- Built-in thermostat with LCD
 - Displays temperature, humidity and fan status
 - Adjust temperature and humidity setpoints
 - Change filter and system status indications
- Easy to install and to maintain
- Optional anti-germ UV light
